

Quality Actions for Quality Clients

Enid, OK - Oklahoma City, OK

Now Hiring!

Environmental Scientist/Air & Regulatory Specialist

Envirotech Engineering and Consulting is a full-service design engineering, environmental consulting, and geotechnical services firm servicing public and private clients throughout the country.

For over 30 years, we have provided exceptional service to our clients, our talented team members, and their families. Our outstanding growth has been a direct result of the commitment of our team members to our Mission of Quality Actions for Quality Clients.

Our workplace culture is a rewarding and refreshing combination of opportunities for empowerment and career advancement. Our current President is one of the owners, is just 38 years old, a Professional Engineer (PE), is highly trusted by team members and clients, and has worked for Envirotech since graduation from college.

If the following sounds like you, we suspect you will thrive in this role:

- Be paid what you're worth! And enjoy great benefits. We will openly discuss pay, including all benefits, in our very first conversation. Compensation also includes potential bonuses. We know that pay and benefits are critical elements to your professional success. Secondly, we want our culture to be what engages and retains you.
- This position will report directly to the Environmental Department Manager. The benefit to you is that you will have fast, near-immediate access to a servant-leader who advocates for your ideas, requests, and success.
- You have communication skills that allow you to relate to, and build trust with everyone, from all diverse backgrounds and experiences.
- You will enjoy great amounts of autonomy. It is how we operate. All of us work as one team, and we trust our supervisors, managers, and leaders to be fully accountable for driving 'Quality Actions,' as our Mission Statement, professes. It works. It really does.

The Environmental Team qualifications:

- 4-year college degree in environmental science, engineering, geology, or a relevant field
- Minimum 5-year experience
- Applicable work experience
- Understands utilization and billable rates
- Able to review historical projects and profitably re-create them with updated locations, client specifics, etc.
- Must be legally eligible to work in the U.S., can pass comprehensive background checks, and are willing to submit to a drug screen if asked
- Current OSHA 40-hr HAZWOPER is preferred

Other primary duties:

- Air permitting and compliance
- Regulatory compliance reporting
- Oil and gas regulatory experience
- Oil and gas air quality air permitting and compliance experience
- Experience with GRI-GLYcalc program
- Working knowledge of GHG reporting Subpart W
- Prior experience with submitting Subpart OOOOa reports to EPA
- Industrial SWPPP Development
- SPCC Plan development
- Soil and groundwater assessments
- Risk-Based Corrective Action report development
- Carbon credit and sequestration experience
- Technical report preparation
- Working knowledge of state and federal environmental regulations
- Preparation of air emissions inventories
